

Vent-less Hood Conversion

(EVBEL30/36 & EDH30 MODELS ONLY)

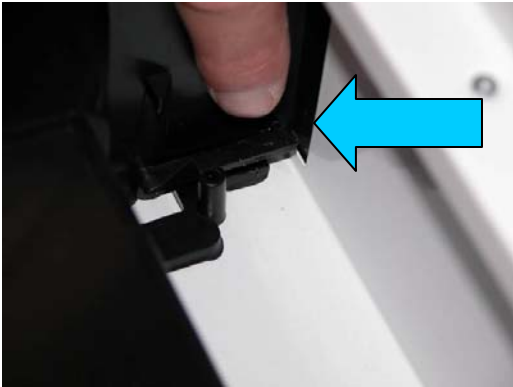

1

This ventilation hood can be installed to vent outside (factory position) or to re-circulate back (vent-less) into the kitchen. The vent-less application requires the use of the carbon filter kit (carbon filter kit # KIT01233 for 30" width & KIT01234 for 36" width products).

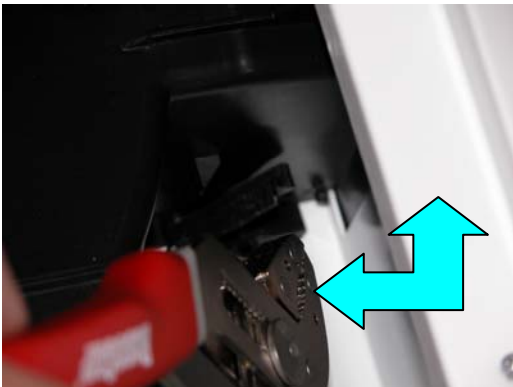

The black plastic lever / tab is located in the area noted by the blue arrows (illustrations 1 & 2).

2

The black plastic lever / tab (horizontal positioned) is located just below the finger pointing downward.

3

Using small pliers gently pull the black plastic lever / tab out slightly and up to re-position the tab vertically (illustrations 3 & 4).

Lock behind the plastic tab to secure vertically.

4

Attach carbon filter kit to existing aluminum mesh filters as described within the carbon filter installation instructions.

Replace aluminum mesh filters.

Vent product is ready for vent-less installation.
